Corner paving slab holding plates system

Article:

2

In a box:

10 pcs.

A set of two plates for holding the vertical finishing slab of the terrace corner built on support pads with a fugue width of 4 mm maximum.

System compatible with support pads:

- Standard - heights from 35 mm to 380 mm
- MINI BALANCE - self-leveling - heights from 25 mm to 50 mm
- STANDARD BALANCE - self-leveling - heights from 47 mm to 377 mm

The use of slab holding plates gives us the opportunity to create a solid, very attractive terrace figure. The end result will certainly enjoy the eye for many years with significant savings in time and work.
