

## PRODUCT SHEET

### Flat roof pipe collar – thermoplastic bitumen membrane

**Article:**

i58

**Diameter:**

80 - 160 [mm]

**Height:**

130 [mm]

**In a box:**

50 pcs.

Intended for sealing through-roof passages of sewage, ventilation and other pipes.

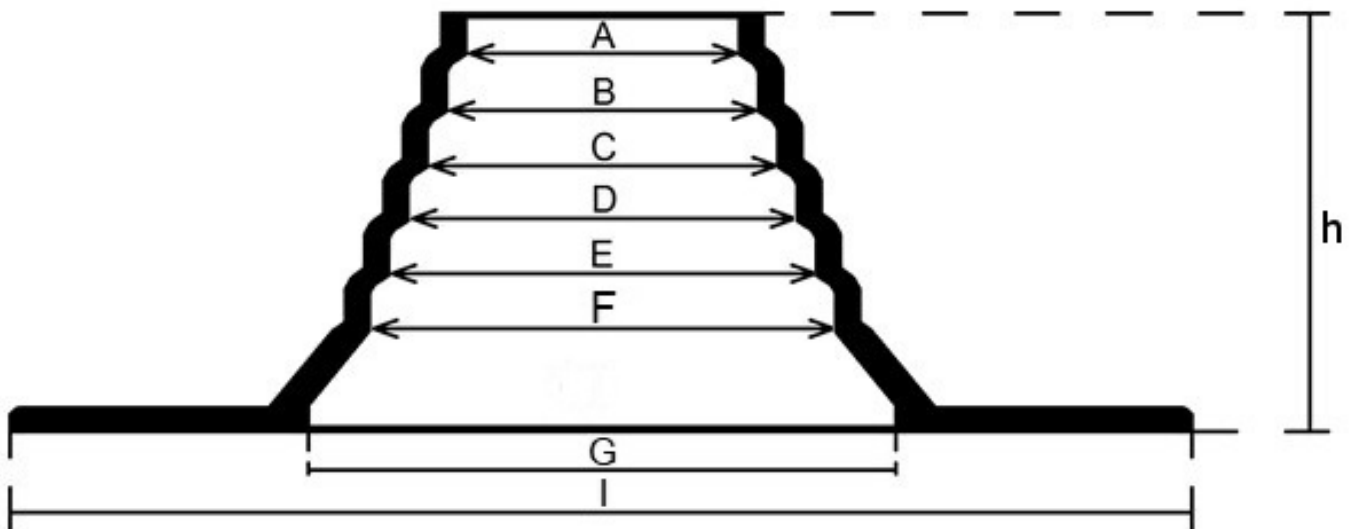

Can be bound with thermoplastic bitumen after heating with a burner.

Does not require adhesive.

The diameter can be adjusted (by trimming) from 80 mm to 160 mm.

We recommend using a band clip to provide more effective sealing.
