

PRODUCT SHEET

Protective set for through wall parapet roof outlets, diameter 50 - 125 mm

Article:

i24+24.3

i24+24.4

Application:

Bitumen membrane

PVC membrane

The set includes **the i24 protective guard** and mounting intended for the **i24.3** thermoplastic bitumen membrane or the **i24.4** mounting for the PVC foil.

The purpose of the set is to secure the through wall parapet roof drain against clogging with the contamination that may be found on the roof.

- To install the set, first you should adjust the guard and correctly cut it.
- The next step is to mark the places, in which the handles will be mounted.
- The installation of the handles occurs after they and the place of planned mounting are heated as they completely bituminise with the dedicated waterproofing.
